The Battery Energy Storage System (BESS) is a versatile technology, crucial for managing power generation and consumption in a variety of applications. Within these systems, one key element that ensures their efficient and safe operation is the Heating, Ventilation, and Air Conditioning (HVAC) system.

Using Lithium-ion battery technology, more than 3.7MWh energy can be stored in a 20 feet container. The storage capacity of the overall BESS can vary depending on the number of cells in a module connected in series, the number of modules in a rack connected in parallel and the number of racks connected in series.
