Solar generators are available as both portable generators and backup home generators. Most solar generators are portable, lightweight, and have a built-in handle. The best portable solar generators are used to provide power for construction sites, campers, events, or other settings where access to electricity is limited.

To calculate how long the solar generator will last when the mini fridge is plugged in, we divide the battery capacity with the power consumption of the appliance - $500\text{Wh}/50\text{Wh} = 10$ hours We could power our fridge for 10 hours straight. Our solar generator has a lithium battery that discharges to 80%. So in reality, we don't have a 500Wh capacity.
