

660 Photovoltaic Panel Packaging

PVpallet offers sustainable packaging solutions for the solar industry, promoting a circular economy and addressing challenges like damaged solar panels, rotted pallets, and disposal fees. Our products include a patented reusable solar panel pallet, BOS (balance of system) bulk bins, handheld totes,

The main difference of the solar panel price is between Tier 1 Solar Panel and not Tier 1 Solar Panel. If you order the mainstream solar panel --- cell size 166*166mm or 182mm*182mm (210*210mm will soon becoming popular), cell number 54pcs,60pcs, 72pcs, watt :365-670W), you can get the lower price, because our factory or others" have the stock.

The panels are usually shipped on pallets holding between 28 and 30 panels each. However, there is globally no accepted and widely applied standard for the packaging, loading, transport, and unloading of solar PV modules. Panel manufacturers often have their methods of packaging that may vary from one another.

Just like framing, sorting, and packing can be manual, semi-automated, or fully automated. Manual solar panel machines are the least expensive and are typically suited for small-scale operations. Semi and fully-automated machines are more suited to medium to large-scale solar panel manufacturing. Automated sorting machines offer numerous benefits.

As solar manufacturing continues to evolve in the United States, so does solar packaging. UFP Packaging is a leading supporter of the thriving solar industry and has actively produced solar module packaging for the past decade. With extensive experience on a national and global scale, UFP Packaging stands out as a trustworthy partner.
