A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes. If you run Direct Current (DC) directly to the house, most gadgets plugged in would smoke and potentially catch fire. The result would be ...

Inverters for solar power vary. Your solar power inverter will not last as long as your solar panels. Its longevity depends on the make or model solar inverter and how it is used. The components of solar inverters are more complex than solar panels. They are heat sensitive, which makes them more vulnerable.
