Will Romania's natural gas storage facilities reach 80% capacity?

BUCHAREST, Oct 3 (Reuters) - Romanian natural gas storage facilities have been filled above a targeted 80% capacity and could reach 90% by Nov. 1, deputy Energy Minister Dan Dragan said on Monday. Unlike other countries in the region, Romania relies less on Russian gas.

How much gas is in storage in Romania?

In Romania, the amount of gas in storage has fallen to 63% in just one and a half months, with more than a third of the gas in storage being consumed, a steeper fall than the European average, according to Gas Infrastructure Europe. On January 8, 2025, the filling rate of storage facilities in Romania was 61.74%.

How much energy is consumed in Romania?

About 15% of the final consumption of energy in Romania is consumed as electricity. In accordance with EU directives and climate control ambitions, additional effort and money was put into improving renewable energy sources. The target of 24% renewable energy was reached in 2020.

How will high energy prices affect Romania?

Regional implications Romania is at risk of maintaining its top position in terms of high energy prices, which could affect the competitiveness of industry and the population's purchasing power.

Why did gas prices rise in Romania?

Then there was market volatility, so that the rise in prices on the Dutch TTF exchange, the benchmark for Europe, was also felt on the Romanian market, where gas was traded at the equivalent of EUR51/MWh at the end of the year.

What has Romania done well in recent years?

"What Romania has done well in recent years is the investment in the Iasi-Ungheni gas pipeline, which has a transmission capacity of over 6 million cubic meters, which fully covers the natural gas consumption between the Prut and the Dniester," Sebastian Burduja also mentioned. Medium-term implications

Romania's inaugural Contracts for Difference (CfD) auction has successfully allocated over 1,500 MW of renewable energy capacity, marking a significant step forward in ...

The average electricity price in Romania has dropped from 349.93 USD/MWh in 2022 to 219.36 USD/MWh in 2023. Since 2017, the average electricity price in Romania has fluctuated ...

Romania's energy ministry has re-launched a competitive tender for battery storage projects, seeking to have at least 240MW/480MWh of energy storage facilities up and ...

Among the 39 projects is the installation of at least 1,500 MWh of battery storage systems in existing renewable energy plants in Romania. These projects will help lower-income EU countries strengthen their clean ...

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

Mandatory solar panels on new commercial buildings and 5 billion EUR grid upgrades to integrate distributed storage. 1 GW operational storage by 2025, rising to 5 GW by 2026 to stabilize the...

Energy consumption per capita is about 1.6 toe (2024), which is 43% below the EU average, and electricity consumption amounts to 2 400 kWh/cap (57% below the EU average). Total energy consumption remained stable at 30 Mtoe in ...

Battery Energy Storage Systems (BESS) are becoming essential in the shift towards renewable energy, providing solutions for grid stability, energy management, and ...

In 2024, Romania ranked among the most expensive energy markets in the European Union (EU), occupying third place in the spot markets ranking. At the same time, accelerated consumption of gas from storage and ...

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local ...

The cost of energy storage is typically measured in dollars per kilowatt-hour (kWh) of storage capacity. According to the same BloombergNEF report, the average cost of lithium-ion batteries was \$132 per kWh in 2021.

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported ...

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the levelized cost of energy. The 2022 Cost and Performance Assessment ...

Romania's energy sector is characterized by opportunities in emerging areas such as hydrogen and LNG,
