How does Swissgrid distribute costs?

The distribution of costs by Swissgrid takes place according to usage. Where this is not possible, the costs are passed on to the distribution system operators and the end consumers at the respective grid level on the basis of meter data for services and energy and corresponding tariffs and billing rates.

How does Swissgrid calculate grid usage & system service tariffs?

Every year Swissgrid calculates the grid usage and system service tariffs for its services - the operation, maintenance and expansion of the transmission grid. The distribution of costs by Swissgrid takes place according to usage.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from EUR50,000 to EUR200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

How does Swissgrid work?

Swissgrid operates in a regulated market under the supervision of the regulatory authority Swiss Federal Electricity Commission (ElCom). The ElCom serves as 'price monitor' in the electricity sector and checks the tariffs billed by Swissgrid. The tariffs and rates are given in Swiss francs, unless another currency has been given.

Does Swissgrid charge a power reserve?

These include the hydropower reserve, the reserve power plants and the emergency power groups. The federal government has decided that these costs will be charged via Swissgrid. Swissgrid reports these costs, which it does not incur, in accordance with the ordinance on a separate 'power reserve' tariff.
