What is a battery energy storage system?

A battery energy storage system (BESS) is an electrochemical device that charges (or collects energy) from the grid or a power plant and then discharges that energy at a later time to provide electricity or other grid services when needed.

How long can a battery last in an ESS?

However, even at 80% capacity, the battery can be used for 5-10 more years in ESSs (Figures 4.9 and 4.10). ESS = energy storage system, kW = kilowatt, MW = megawatt, UPS = uninterruptible power supply, W = watt.
