Solar windows is the term often given to see through solar panels which resemble glass panes. The panes include the solar PV technology needed to generate electricity from the sun. In theory, this would mean that we could replace our standard glass windows with versions that also function as solar panels, maximising the renewable energy generated from our homes.

For every 10 sq. ft. of window space, these solar window blinds can generate 100 watts of power (you could roughly power three laptops with this much electricity). These solar blinds can be installed either inside or outside, ...

You should never clean your solar panels yourself. We have specific protocols when performing solar panel cleanings. There are a lot of safety risk when climbing on a ladder and climbing onto a roof. We have the proper tools and equipment to get the job done safely and efficiently. You should never use tap water to clean your solar panels.
