

Being fooled into buying a solar power source

Are there myths about solar panels?

Homeowners are installing solar panels in increasing numbers and reaping the financial and environmental benefits. But some are still hesitant because of myths around cost, performance and durability of panels. Here, we debunk the most common myths so that you have all the facts you need before you pivot to panels

Should you invest in solar panels?

More than a million homes in the UK now have solar panels. They're a guaranteed way to use truly renewable electricity, but many people are not sure about whether to invest. Some are put off by uncertainty about costs, others believe the installation will be disruptive and many worry that solar panels will be tricky to maintain.

Can you make money from solar panels?

Beyond that initial cost, you could also make money from any excess solar energy your panels generate. This energy can be sold back to the grid via a Smart Export Guarantee scheme. This provides you with a guaranteed fixed fee per unit of electricity you sell back to the grid over a fixed time period.

Should consumers be worried about shoddy Solar Contractors?

The report warned consumers about shoddy solar contractors and problematic leasing arrangements, highlighting, for example, a Maryland complaint regarding an 84-year-old man who had been induced to sign a 20-year lease for solar panels. Attorneys general are also taking steps to protect consumers from rooftop solar companies.

Why do people worry about solar panels?

Some are put off by uncertainty about costs, others believe the installation will be disruptive and many worry that solar panels will be tricky to maintain. These were among the most common questions and concerns people had about getting solar panels, according to a government report in July 2021.
