

Electronic road sign solar panels

Solar power is created from the Sun's energy. As the Sun's light hits the solar panel, it is converted into electrical energy that can then be used to sustain devices that electricity normally powers. Thanks to the consistent nature of sunlight, LED solar-powered traffic signs rarely need to be replaced

We supply Solar and/or Battery operated signage with custom sizes and designs available. We supply the traditional motorway signage as well as any workplace specific requirements. 6 Volt or 12 Volt

Operate completely free by using the power of the sun - eliminate the cost of electricity (rising 3.3% yearly on average over the past 30 years).. Practical and cost effective to install - the cost to run traditional electricity to a distant sign near the road or far from the building is more expensive than one of our kits.No costly trenching to run wire underground or replacing the the ...
