Criminals are starting to observe solar farmsand they know there's copper in the cabling,and solar panels there." Copper hit a record GBP 7,500 per ton in February,according to Richie Iwanoff,head of telecommunications company British Telecom's acquisitive crime team.

Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.
