

# Government procurement price of solar with battery in Poland

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately EUR1 billion).

What is the cost of solar power in Poland?

In the latest auction for renewable energy projects held by the ERO, solar power had an average price of PLN207.85/MWh and accounted for around 570MW of the allocated capacity in Poland. Currently, Poland has an installed PV capacity of more than 6.3GW.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

What is the solar energy revolution in Poland?

The solar energy revolution in Poland is in full swing. In December 2022, RES auctions were held for PV projects, among others. In the basket dedicated to large projects (above 1 MW), photovoltaic installations retained an advantage in terms of installed capacity over wind power plants.

Are prosumers eligible for a solar subsidy?

Net-billing prosumers who incurred installation expenses after Jan 1, 2021, are eligible. The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage.

How many solar panels did Poland add in 2023?

Poland added around 4.6 GW of solar in 2023, taking its cumulative installed capacity beyond 17 GW. The country transitioned from net metering to net billing for its micro-installation market in mid-2022. This content is protected by copyright and may not be reused.

Poland's \$1 billion solar subsidy for grid scale battery storage is now open for applications. It aims to enhance the stability of the country's power grid.

This chapter covers Polish public procurement laws, including relevant legislation, legal applications to entities and contracts, award procedures and more.
