Hybrid solar system is a renewable energy system that is grid-tied and includes battery storage. The system uses solar panels to produce energy during the day, while the batteries store excess energy for use later at night when there is no sunlight. Hybrid solar systems have both on-grid and off-grid capabilities, allowing you to continue running on solar power even if the grid goes dark.

Monocrystalline solar panels are the most cost-effective option. Perovskite panels are more efficient and will be on the market soon. Thin film panels are the cheapest, most versatile choice. It's confusing enough trying to find solar panel prices, never mind choosing between the different types of solar panels to pick the right one for your home.
