

# How much does it cost to replace the generator of Fengjun 5

How much does it cost to run a generator?

Depending on the fuel used and size of the home it can cost around \$40-100 a day to run a generator. When calculating the cost of installing a generator in your home, the biggest factors to consider are the type of generator you install and the power of the generator itself - the higher the wattage, the higher the cost.

How long does it take to install a generator?

Connecting electricity and gas sources can take a few weeks to arrange, especially if the house wiring needs upgrading. Once this is in place it generally takes around three days to install a generator, test the wiring, inspect the fuel line and run final tests. One extra we recommend is adding a new sub-panel with a transfer switch.

Should you buy a gas generator?

With high availability and reliability, they can be 30-50% cheaper to run than other options. The downside is if your power or gas supply went out at the same time then the generator would not run without fuel being added manually.

How many kW does a standby generator need?

More than 7kW required: Standby generators, also known as whole-house generators, can power the entire home, including lighting and appliances for long-lasting outages. They are more fuel efficient than portable generators and as they are connected to your home they can activate quickly and restore power in a crisis.

The cost to install a generator transfer switch is \$400 to \$2,500 on average for the unit and labor. An automatic transfer switch costs \$400 to \$2,000 for the unit alone, while a manual transfer switch costs \$200 to \$800. A generator interlock kit costs \$400 to \$850 installed. Generator transfer switch cost - chart
