What is a solar bridging ladder?

Ideal for repairs, inspection and maintenance, The Solar Bridging Ladder makes it easier to safely reach the solar panels once on the roof. Its three-part design is lightweight and easy to use. The CoverSafe Spark provides protection when working in loft spaces, especially for installing solar inverters.

What is included in a solar panel installation package?

It includes the Solar-Dec Platform or SolarLine Access System for roof-level access, the Solar Bridging Ladder, and the CoverSafe Spark for loft work. This all-in-one package ensures your team can work safely at every stage of solar panel installation.

How does a solar panel installation platform work?

The solar panel installation platform can be transported easily in a transit van or on a roof rack, and it assembles within minutes. Its lightweight construction also allows the platform to be lifted and shifted around the worksite without disassembly, making it ideal for projects that require flexibility.

What types of roofs can I install solar PV on?

Our solar PV installers, roofers and electricians have carried out installations on most types of roofs, including commercial roofs and flat roofs.
