There is nothing more remarkable to me than the power of nature. It is both cataclysmic and subtle. Slow and continuous erosion by water and wind can create landscapes every bit as astonishing as those shaped by catastrophic events - and minuscule details can be as breathtaking as grand vistas that stretch from one horizon to the other.

Wind turbines turn energy from the wind into electricity. Turbines turn so that they face into the wind. The turbine blades are shaped so that even low winds will push them round. Kinetic energy ...
