

Why is Singapore a good place to invest in renewables?

Finally, Singapore has built up a vibrant ecosystem of companies across the value chain ranging from clean energy solution providers, project and legal advisories and financiers that can support the development and execution of renewables projects in the region.

Can Singapore be a green financing hub?

We encourage companies to leverage Singapore's strengths as a green financing hub to tap on the wide range of world-class financial institutions here, such as UOB and Clifford Capital to support investments into renewables.

What is a battery stacking project?

In 2025, a battery stacking project was piloted to increase the storage capacity to 326MWh. It is the first operational ESS to be expanded vertically, delivering more power within the same footprint. A rail-guided battery stacking method was implemented to safely position the batteries without the use of large crane.

The Climate Investment Funds (CIF) is one of the world's largest and most ambitious climate finance mechanisms. Founded in 2008, it represents one of the first global efforts to invest in a ...
