

# Is solar power cheap

As of 2024, home solar installations can cost anywhere between \$18,000 and \$20,000. While solar can be a great addition to most homes, it's a huge investment. Looking for a reliable, cheap solar panel brand can be daunting.

Good solar panels should last as long as 30-40 years, while the lower quality alternatives don't tend to make it so far. Cheap solar panels are cheap for a reason; they don't cost much to make. For example, budget manufacturers will tend to use a fairly basic type of glue, which can put their panels at risk of delamination.

High-quality, cheap solar panels are available at SunWatts for under \$1 per watt. These are new, A-grade solar panels with UL certification, 25 year performance warranty and qualify for energy tax credits and solar rebates. The market prices for these cheap solar panels can change often, so be sure to bookmark this page to see what is new.
