Any combination of LEDs on condition that the blue LED is on. Any combination of LEDs on condition that the green LED is on. Any combination of LEDs on condition that the red LED is on. Your inverter has a switch and three colored LEDs that indicate information such as performance and errors. Learn what they mean. | SolarEdge US

What does a flashing light mean on a PV system?

The opposite slow flashing means your battery is losing power. Load Icon: This is the load you put on your PV system. This icon lets you know if it's big, small, or perfect. Depending on the Charge Controller, Light Blinking here means Overloading and Short-circuit.

Why is my solar panel flashing green?

Solar panel flashing green light When the solar controller detects solar energy input, the PV icon and light will blink for a few seconds, and then enter a stable state. The screen will not light up and the indicator light will not light up if the solar regulator does not detect the solar input.

What does a flashing red battery light mean?

A flashing red battery light means the battery is undercharged and needs to be recharged in time. Solar controller loads are small DC devices that can be powered directly by a solar battery. They are displayed as light bulb icons on screens and LED lights. On the screen, when the load icon flashes, there is an overload or short circuit.

Why is my solar panel light blinking red?

If the solar input is unstable or the pressure is too high, the solar panel light will blink yellow or red to indicate that the solar input is not stable. The solar panel light does not light up at night because there is no solar input, if the light does light up, there is a problem with the charge controller.

What does light blinking mean on a solar charge controller?

Load Icon: This is the load you put on your PV system. This icon lets you know if it's big, small, or perfect. Depending on the Charge Controller, Light Blinking here means Overloading and Short-circuit. All of these may vary depending on the type of Solar Charge Controller you have. The key point here is the basic introduction.
