6. Drive mechanism: This component, found in solar trackers, includes gears, motors, and controllers that drive the motion of the panels to follow the sun. 7. Electrical boxes and wiring conduits: These are used to house electrical connections and protect the wiring that runs between the solar panels and the rest of the electrical system. 8. Adjustment mechanisms: Some ...

A photovoltaic bracket is an essential component of the installation of solar panels. Its role is to support the solar panel and fix it in the correct position to capture solar energy to the maximum extent. Different materials and designs can be used for photovoltaic brackets depending on the installation site and requirements.
