A photovoltaic bracket is an essential component of the installation of solar panels. Its role is to support the solar panel and fix it in the correct position to capture solar energy to the maximum extent. Different materials and designs can be used for photovoltaic brackets depending on the installation site and requirements.

Today, Topenergy has transformed from a traditional solar energy bracket company to a technology-driven company focused on improving the efficiency of solar energy power generation. We uphold the mission of "helping customers improve solar energy power generation efficiency", we hope to become a technology leader in improving solar energy power generation efficiency.

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. The related products of the solar support system are made of carbon steel and stainless steel. The surface of the carbon steel is hot-dip galvanized and will ...

In some coastal areas, because of the frequent hurricanes, the strength requirements for photovoltaic brackets are very strict, which requires PV bracket manufacturers to be able to design a sufficiently strong solar bracket system. However, the increase in strength is always accompanied by an increase in cost.
