

Photovoltaic panel installation recruitment scam

Are free solar panels a scam?

Emails offering cheap solar panels or appearing to be backed by a Government scheme could also be scammers, taking you to an seemingly-official website offering free or cheap installation. These incredible deals rarely exist, so approach these with caution to avoid wasting your time. 3. Free solar panel online ads

How do I know if a solar company is a scam?

Be wary of solicitors. Always verify the identity and credentials of anyone claiming to represent a solar company. Unscrupulous solar companies may employ aggressive or dishonest sales tactics to close deals quickly, especially if the proposed solar installation isn't in your best interest.

Are 'fake' solar companies a scam?

Beware of any company asking you to make a big deposit before they have completed their installation. This is one of the most common ways 'fake' solar companies have targeted consumers - whereby they take a hefty deposit and then never turn up to carry out the installation. This is common solar scam.

How do I protect myself from solar scams?

Protecting yourself from solar scams means taking a proactive approach and following a few key strategies. One of the most effective ways to protect yourself from solar scams is to know the average cost of solar panels in your area. By researching prices, you can identify quotes that are suspiciously high or low.

Are solar panels a scam or a cold call?

Here are the cold calls and potential scams to avoid. More than a third of solar PV panel owners in our recent survey told us they have been cold called about their panels in the past five years. Most cold callers were trying to sell them something unnecessary, but a few owners were told something completely untrue.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

Thousands of households are at risk of falling victim to misleading solar panel schemes which are up by 50 per cent over the last year, data from Action Fraud reveals.
