Retail and Hospitality: Hotels, restaurants, and retail stores can install solar PV systems to reduce operational costs and demonstrate a commitment to sustainability to their customers. Remote and Off-Grid Applications : In areas without access to the main grid, solar PV provides an essential energy source for businesses and communities, supporting local economic development.

A grid-connected solar power system is a system that generates electricity without batteries. Your home's solar electric system is connected to the national grid, and with the flick of a switch, you have electricity at your fingertips - from the sun during the day and from the municipality at night.
