

Photovoltaic solar panels salesperson real

Do you blame salespeople who work for solar companies?

Otherwise, people who've gotten solar that I know have all gone with companies that they researched and called themselves- and that absolutely do not engage in predatory unsolicited sales tactics. That said, I'm not necessarily blaming salespeople that work for these companies- I understand it.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How do I know if a solar PV company is a good company?

Check that the solar PV company is MCS certified. This is often required for government support schemes or to get Smart Export Guarantee (SEG) payments. Check if your installer is a member of RECC. Members agree to uphold high standards of consumer protection. RECC runs dispute resolution if you need it.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

How much electricity does a household solar system provide?

Household solar panel systems are typically up to 4kWp. We spoke to more than 2,000 solar panel owners about the size of their system and how much of their electricity it provides in summer and in winter. Which? members can log in to see this data.

Are solar panels a waste of money?

Too large a system may be a waste of money if you generate energy that you can't use, although installing a solar battery and/or exporting energy to the grid can help make the most of any excess. Solar panel system sizes are normally expressed in kilowatt peaks (kWp), which is the maximum output of the system.
