Starting from only R1 540 per month, you can power your home or office at any time of day -- even during load shedding and power outages.

Flat roof solar panel mounting is usually done with ballasts, which can also incur extra costs during purchase. Ballasts can be around R60 to R120 per kilowatt on average but prices can vary based on sizes and whether they offer "universal" mounting or only mount certain panel systems. They can also be quicker to install making them cheaper in terms of the ...

Where an installation is owned by a rent-a-roof company, we would expect there to be a signed "agreement" between the relevant parties, i.e. the homeowner and the rent-a-roof company, such as a lease agreement, with the homeowner agreeing to rent their roof to the company for the purposes of installing solar PV panels.

To construct such a system, you will have to either place 258 100-watt solar panels, 86 300-watt solar panels, or 64 400-watt solar panels on your roof. If you check the chart for the 2000 sq ft roof area, you can see that all these numbers are right there.

In some cases, landlords might choose to finance the solar installation themselves, reaping the full benefits of the generated energy. Alternatively, you can explore third-party ownership options, where solar companies finance, install, and maintain the solar system while the landlord enjoys the advantages of clean energy and potential cost savings.

At Sunbelt Rentals Power we can offer a complete power management solution that will be tailored meet your requirements.
