

Replace the alternator belt of Fengjun 5

How do you remove an alternator belt?

Remove the wrench or breaker bar from the tensioner pulley once this is done. Slide the belt over the alternator pulley. If you loosened the alternator to remove the old belt, reverse that process by sliding the belt back over the alternator pulley. Again, take care not to place too much pressure on the loosened bolts of the alternator.

How much does alternator belt replacement cost?

The alternator belt replacement cost (also known as serpentine belt, v-belt, drive belt or fan belt) are made up of material costs (approx. \$20 - \$30) and labour costs (approx. \$60 - \$200). For most vehicles, costs of around \$80 - \$230 can be expected.

Do I need to change the alternator belt?

In most cases it is sufficient to change only the alternator belt (or serpentine belt) and there are no additional costs. Occasionally, however, an additional change of alternator belt tensioner and pulley makes sense, as the material costs are low compared to the labour costs.

How do I know if my alternator belt needs replacing?

One of the most common signs that your alternator belt needs replacing is a squeaking or chirping noise coming from the engine. If left alone while faulty, this could cause your engine to overheat and potentially break down. Need a drive belt replacement?

What happens if the alternator belt fails?

⌘; The electronics may fail The alternator belt also drives the alternator and this starts the car battery. Without the alternator, electric accessories such as A/C, radio or plugs will only run on the remaining energy of the car battery.

How long does alternator belt replacement take?

The average alternator belt replacement time will take roughly between 30 - 60 minutes, provided that no further work is necessary. The alternator belt replacement is therefore surprisingly fast when compared to other car repairs. A big advantage when changing is the easy access to the alternator belt.

Step 3 - Get Familiar with the Alternator Belt. Know how the alternator belt is attached and where it is attached exactly, you will need to know this when you put in the new alternator belt. Memorize every twist and turn the belt goes. It is imperative that you put in the new belt exactly the way the old one was put, or else it will not work ...

The engine of your car can have several belts depending on its design. Most modern vehicles have one drive belt or serpentine belt that brings power from the engine to various accessories like the water pump, AC, and

Replace the alternator belt of Fengjun 5

the alternator.. In some cars, you will have a separate belt in charge of the alternator, aptly called the alternator belt.

For instance, the alternator itself might be faulty, or its pulleys and tensioner. These other problems may stretch the budget to \$300, hence the \$60 - \$300 price range. I am just saying this is not typical and so not in all cases. Let's now look at how to replace alternator belt. How to replace alternator belt

Step4: With this bolt loosened, move the alternator to a position that slackens the alternator belt. After this, locate the serpentine belt tool and proceed to remove the belt from the pulley. Step 5: Locate and remove all the bolts holding the alternator in place. In some instances you should be able to access said bolts with your ratchet.

How long does it take to replace an alternator? Replacing an alternator typically takes between one and two hours, depending on the vehicle's design and accessibility. What tools are needed to replace an alternator? Tools needed to replace an alternator include a wrench set, socket set, ratchet, screwdriver, and possibly a belt tensioner tool.

The alternator belt on the KIA Spectra 5 is a single belt that controls the alternator and the water pump. The alternator/water pump belt is controlled by the crankshaft pulley. ... If the belt becomes damaged or cracked, replace the belt as soon as possible before it breaks. Step 1. Park the KIA Spectra and engage the parking brake. Open the hood.

Using a 3/8 breaker bar release the tension on the belt tensioner and slip the belt off the water pump, then it'll be easier to take it off the alternator pulley. There's a 13mm nut attaching the main power cable (cable covered with a heat resistant silver colored material) to the alternator and a small dark gray plug with a thin single wire towards the rear of the alternator.

The alternator belt replacement cost (also known as serpentine belt, v-belt, drive belt or fan belt) are made up of material costs (approx. £20 - £30) and labour costs (approx. £60 - £200). For most vehicles, costs of around £80 - £230 ...
