Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect ® Solar, thyssenkrupp Steelnow offering high-performance, zinc-magnesium-coated steels for PV mounting systems - durable, robust and sustainable.

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect ® Solar offers several advantages compared to pure zinc coatings.

Why should you choose ZM ecoprotect ® solar?

The new coating is the consistent economic further development as an alternative to batch galvanizing. The guaranteed service life of up to 25 years also leads to low maintenance expenditure on the PV ground-mounted systems. With ZM Ecoprotect ® Solar, we are clearly offering extra sustainability.

How many gigawatts of photovoltaics will Germany have in 2022?

Based on 2022, an additional capacity of only 7.5 gigawatts has been installed, which is not nearly enough to build the total planned capacity of 215 gigawatts of photovoltaics in Germany by 2030. Capacities must be built up, especially in the free-field sector, in order for new solar installations to be connected to the grid on the desired scale.
