Which TV wall bracket should I buy?

Shopping for a TV wall bracket that's strong and feature-rich? The HDTV-DXL is a top all-rounder. Made from sturdy alloy steel, it gives you full control over how you want your telly positioned - tilting up to eight degrees downwards, extending outwards up to 50 cm and swivelling horizontally by up to 160 degrees.

Are all TV wall mounts VESA compatible?

VESA (Video Electronics Standards Association) is a widely regarded mounting standard that ensures all wall mounts are compatible and line up. We've made sure that all the TV wall mounts above have this guarantee. To test TV wall mounts, we had to mount some actual TVs. It seems obvious, but not all guides you read online will have done it.

Which HDTV bracket should I buy?

If you have more wall space to work with and your telly is between 24 and 60 inches, we love the design and features of the full-motion Invision HDTV-E. This bracket gives you a tilt of eight degrees downwards and up to 50 cm extension, plus up to 180 degrees horizontal swivel - that's slightly more manoeuvrability than our top pick.

Which TV wall mount is best?

Up, down, left, right, forward and backwards. This TV wall mount offers the ultimate flexibility, while still maintaining its stability with TVs up to 82-inches. It's quick to set up as a result, though. 3. Perlesmith PSSFK1 For a smaller TV in a kitchen or bedroom, this is the TV wall mount for you.

Why is This TV wall mount so easy to setup?

Build quality: Key to why this TV wall mount is so easy to setup is the fact that it only has two parts, and these haven't been over-engineered either. The focus has been on making the brackets themselves as solid as possible, which is why it feels so secure on a wall when the latches are fixed.

How do you install a VESA bracket on a TV?

Matching the brackets to the VESA on your TV is simple and then once attached, you simply hang the TV on the wall plate and once it clicks into place, installation is over. Some brackets claim a three-step process that never quite works out, but with the VLL5 it really is that easy.
