

Solar Power Rooftop Lease Agreement

How do I end a solar panel lease in the UK?

To end a solar panel lease in the UK, you must make some form of payment to the solar company. The lease agreement will outline the conditions and formula for wrapping up the contract, but there are three broad options: Under a buyout, you pay the outstanding balance on the lease agreement.

What is a solar lease?

Solar leases are similar to car leases; they are a form of third-party ownership. Under a solar lease, the third party installs solar panels on your property and then sells you the electricity produced. Your monthly lease payment is based on the estimated annual production of your solar system.

Should you lease solar panels?

There are five main advantages to leasing solar panels: Save money on electricity: the system will reduce how much energy you use from the grid when switched on. Low or no upfront costs: you don't have to buy the panels and other equipment upfront.

How does a solar lease payment work?

Your monthly lease payment is based on the estimated annual production of your solar system. Ideally, the annual lease payment in Year 1 of the lease agreement should match your energy savings in Year 1. The lease agreement will have a fixed term length, typically 20 to 25 years. At the end of the fixed term, you can either:

What is a solar power purchase agreement?

What is a power purchase agreement? A solar power purchase agreement is a financing arrangement that allows businesses, government agencies and educational institutions to purchase solar electricity with no upfront capital cost. You rent your roof and buy the discounted solar electricity rather than investing in a solar PV system of your own.

Can I lease a roof space for PV panels?

Anyone considering agreeing to a lease of their roof space for fitting PV panels should be aware that most lenders' mortgage conditions will require the lender's consent to be obtained to any lease.
