

Solar Power Swimming Pool

The biggest problem that faces these type of solar swimming pool heaters is that they don't have a thermostat. You cannot say "I want my pool to be 28C, I'll just set this dial to 28C" and sit back and two days later the pool is at 28C and it stays at 28C all season long. With solar heating you get what the sun gives you.

Solar thermal panels for pools heat the water rather than provide electricity (Image credit: LaZer2) Calculating how many solar thermal panels you need. As with solar pv for swimming pools, knowing how many solar thermal panels you need can only be determined with a full evaluation of your swimming pool design and your projected use.

Cold Pool water is diverted through the Pool Solar Heating panels, that are mounted on the house roof, and preferably North facing. The water is returned back to the swimming pool 6-12°C warmer. The circulation process continues the entire day which in turn heats the swimming pool water to a more desirable temperature.

Average Upfront Costs for Solar Pool Heaters. The upfront cost for a solar pool heater is between \$1,500 and \$5,000 on average, but it will vary depending on the size and type of heater you choose.. Size is the most significant factor that will affect the cost of your pool heater.Solar pool heaters are available in various sizes to fit any pool size.
