

Solar panels account for

Can solar panels cover my electricity bill?

With enough solar panels and batteries, it's possible to cover your entire electricity bill, but it's not cost-effective. What's the average electricity bill with solar panels in the UK? The average electricity bill for a three-bedroom household with a 3.5 kWp system is £236 per year.

Can solar panels save you money?

Despite the high upfront cost of solar panels, investing in this technology can save you money by providing your home with free, green energy - which of course affects your electricity bills.

Should you sell your solar panels?

A typical home with solar panels uses 50% of the energy it generates. If you sell the rest through an export scheme, you can cut your electricity bill by more than 60%. So you won't cover all your electricity costs - but you'll usually break even less than halfway through its lifespan.

How do solar panels affect my electricity bill?

How do solar panels affect your electricity bill? Solar panels will reduce the amount of energy used on your electricity bill. Your electricity supplier won't tell you how much solar energy you've used in any given month - the overall amount of electricity you've used will simply go down.

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5 kWp and costs around £7,000.

What type of Solar Panel is it? HMRC makes a differentiation between Solar Photovoltaic (generates electricity) and Solar Thermal (used to heat water). The latter is considered to be an "energy-saver", thus is eligible for the 100% First Year allowances for energy saving plant and equipment.
