The Bermuda Solar Oxygenator Solar Air Pump is a great choice for amateur pond keepers who are more interested in pondlife than complex wiring. It's pretty much ready to go out of the box - just stake the solar panel into the ground and connect it to the pump with the 3m power cable before dropping the airstones into the water.

The Woodside Solar Oxygenator Air Pump for Pond is a solar powered aerator that produces 1.5W of power to send out air bubbles from the single air stone. The bubbles cause the water in the pond to circulate and so ...

Oxygen plays a vital role in maintaining a healthy pond environment. Fish need oxygen to breathe and biological filtration requires water rich with oxygen. In order to maintain a stable pond environment, with clean and clear water, you have to ensure that your pond is adequately oxygenated. Harness the power of the sun to provide oxygen to your ...

A pond aerator is a must have for pond owners only because it can maintain the oxygen levels in the water and ensure the safety of the fishes living in it. But if there is one complaint that pond owners have with the use of a pond aerator is it consumes a great deal of electricity which in turn, costs them a lot.

This 200lph Solar Air Pump is our bestselling model. It boasts twin airline and airstones to generate up to 200 litres per hour of vital oxygen to your precious fish. This solar pump has zero running costs and works best in sunnier weather - just when your pond's inhabitants need it most! Why PondKeeper .uk?

Fish like to breathe oxygen just like you. Aerate your fish's pond water with a solar air pump. Stop worrying about your fish's health. If you have a bigger pond, just add more stone pump aerators. Circulate water in your pond and avoid oxygen depletion. The sun powers your fish air pump during the day. The battery help keeps it running overnight.

Fountains are a great natural aerator, and you don't need a mains socket if you go solar powered! Solar-powered fountain pumps are a good choice if you get plenty of sunlight in your garden, and most even come with rechargeable batteries for overcast operation. Although they won't be able to power huge water displays, quality solar pumps can still give you ...

The combination of solar power and battery backup makes the system reliable and capable of functioning autonomously. This is especially valuable in locations without access to grid power. In summary, a Solar Oxygenator with Battery Backup harnesses solar energy to power a brushless pump, providing aeration to ponds.

The solar energy is used as the power of the aerator in the solar aerator for fish pond to provide sufficient oxygen for fishes in pond, which meets the needs of general aquaculture.
