

# Standalone energy storage project financing options in France 2025

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

How many GWh of storage capacity will NW have in 2025?

This amount will enable the Group to operate more than 2 GWh of storage capacity in France and Finland by the end of 2025. Complementing the equity financing of EUR300 million to be raised in 2022, this financing by two leading institutions confirms the solidity of NW's business model in France and, for the first time, internationally.

Is France a key market for Envision Energy?

Henry Peng, Senior Vice President and President of Latin America and European Region, Envision Energy, said: "France is a key market for Envision Energy as we expand our presence across Europe, and our partnership with Kallista Energy marks a significant milestone in this journey.

How much non-recourse financing has NW secured for its storage projects?

NW has secured EUR430 million non-recourse financing for its storage projects in France and Finland.

Why should you choose Envision Energy storage devices?

A flexible, resilient, and net-zero energy future is supported by Envision's energy storage devices, which are built with a strong emphasis on proven design, safety, and long-term dependability. These products are developed for secure and dependable performance throughout their lives.

TagEnergy will develop and manage the Cernay-lès-Reims project, which is scheduled for grid connection in late 2025. It will have a storage capacity nearly five times larger than France's current largest operational battery.

Construction is set to begin in June 2025, with Envision Energy also committing to a 14-year long-term service agreement (LTSA), ensuring operational continuity and local engagement well ...
