## State Grid cannot log in with WeChat

As soon as the day starts, the first thing that we will check is our phone for any messages we receive while we were sleeping or any other notifications. However, your day can be ruined if, for some reason, you can not log in to your WeChat ...

The gridReady event should do what you need it to do. What I suspect is happening is your filter state is being reset when you update the grid with data - you can alter this behaviour by setting filterParams: {newRowsAction: "keep"}. This can either be set by column, or set globally with defaultColDef.. Here is a sample configuration that should work for you:

3) new phone directed me to open old phone wechat, go to scan image on Discover section. 4) scan and now wechat works on new phone. I don't know the logic to it but it worked. But yeah, if ever want wechat on a new phone and you're not on the country of your wechat number, you may be screwed. Wish my family used whatsapp instead.

You signed in with another tab or window. Reload to refresh your session. You signed out in another tab or window. Reload to refresh your session. You switched accounts on another tab or window.
