Our solenoids are responsible for the high-precision control of pressure levels and volume flows in the field of hydraulic actuation. They are used in transmission management, to control clutches, to engage gears, and to lubricate and cool other components.

Kempston Controls stocks a select range of pneumatic valves and manifold products including pneumatic manual control valves, solenoid coil connectors, solenoid control valves and more, suitable for a wide range of applications.

The transmission solenoid, or solenoid pack, is a type of electromagnetic valve whose function is to control the Automatic Transmission Fluid, ATF flow, or transmission flow. Solenoids are usually installed in packages in the transmission control unit or valve body.

The average cost of replacing a solenoid is \$600. This includes \$50-\$350 for the solenoid or solenoid pack. The rest is the cost of labor. Here, you'll usually pay for 2-4 hours of your mechanic's time or an average of \$250. The table below shows a quick price comparison of replacing solenoid cost estimates from reputable suppliers:

Intermediate solenoid valves range in price from around \$200 to \$1,500. These models typically feature a two-or three-way configuration, direct-acting or pilot-operated design, manual override switch, and advanced features such as adjustable flow rates and pressure relief valves.

The solenoid valve on ATO can automatically control or remote control on-off the working media such as water, oil and liquid. The solenoid valves are widely applied in medical machinery, solar energy, cleaning equipment, food machinery, burners, welding and cutting, fire safety, environmental water treatment, machinery manufacturing and ...

Replacement solenoid coils are an essential requirement for a solenoid operated valve or switch when the existing coil fails or is damaged causing the solenoid valve to stop functioning. Kempston Controls stocks a select range of Replacement Solenoid Coils from market leading brands including ASCO Numatics, Norgren and more.
