

WeChat Northern Power Grid

What is Northern Powergrid?

Northern Powergrid is an electricity distribution business, delivering electricity on behalf of suppliers from the national transmission system to 3.9 million domestic and business customers.

Does Northern Powergrid need to move a meter?

Although your energy supplier will need to move the actual meter, Northern Powergrid will need to relocate the cables that supply the device. If you spot a problem with your local energy infrastructure, you should contact Northern Powergrid to report it. Issues you might need to report include: Digging into an electricity cable isn't a lot of fun.

What services does Northern Powergrid offer?

What services does it offer? Distribution Network Operators (or DNOs) like Northern Powergrid play a very important part in delivering energy to homes and businesses in the UK. These companies help to maintain and upgrade energy infrastructure like overhead power lines and underground cables.

How do I contact Northern Powergrid?

You can contact them by calling +44 (0) 800 011 3332 or emailing generalenquiries@northernpowergrid.com. You can also call 105 to report a power cut in your area. If you need to get a new property supplied with mains gas or electricity, you'll need to contact Northern Powergrid in order to connect the property to the grid.

How many substations does Northern Powergrid have?

The network consists of more than 63,000 substations and around 96,000 kilometres of overhead line and underground cables. Northern Powergrid is a wholly owned subsidiary of Berkshire Hathaway Energy.

How do I connect a new property to Northern Powergrid?

If you need to get a new property supplied with mains gas or electricity, you'll need to contact Northern Powergrid in order to connect the property to the grid. They are responsible for laying new power cables and hooking up new homes and businesses to the network.

105 POWER CUT LINE. 105 is the three digit number to call if you have power cut or need to report an electricity network safety issue. Launched in September 2016, it's a free service for people in England, Scotland and Wales - and a first for the UK's energy industry.
