We do have some product data sheets available for individual items on the product page, and this is located under "product details" on the product page for customers. In example: As we do have a large range of products on the website, for any items where ...

Some homeowners prefer solid boards because they look more like the real lumber traditionally used for decking. Their deck board ends are more authentic looking because they don't feature the tunnel-like design of hollow boards. Composite decking contains real wood (as well as plastic), but if you want your deck to look like it's made of solid wood, you might prefer solid composite ...

Hollow Composite Board: Lighter, and expands and contracts less than solid boards. Most composite deck board manufacturers in the U.S. offer only solid core boards. The main reason is due to the speed and ease in manufacturing those boards vs. hollow boards. It can be much easier and faster to extrude solid composite boards than it is hollow.
