

# What to buy for solar power

Solar loan: When you buy or take out a loan for a solar panel system, you're eligible for the federal solar investment tax credit (ITC), which allows you to receive a tax credit equal to 30% of the total cost of your system, reducing the expense of going solar by thousands of dollars. Plus, many states have local rebates and incentives that provide additional savings.

If your solar panels produce more power than you can use during the day, you can sell the excess power back to the grid. This is called solar buyback or net metering. Net metering or solar buyback is the ability to sell your excess solar ...

Solar panels can be very advantageous in Scotland, with an average 3kW to 4kW system breaking even in 8 to 9 years.; A system for the average 3-bedroom Scottish home can cost between £5,000 to £8,500, saving £440 to £660 annually.; Several grants can help subsidise solar panels, with schemes like the Home Energy Scotland Grant and Loan offering up to £9,000.

You'll likely need two batteries during the life of your solar panels. Batteries last around 15 years, while solar panels last about 25 years. Consider if you'll recoup the costs over the life of your solar panels. As an example, if a £5,000 battery lasts 15 years, you need to be saving about £330 a year to break even.

Where to buy solar panels. Many businesses specialize in selling and installing solar panels for homes. Search online to locate solar panel suppliers and installers in your area.
