Solar panel's maximum power rating. That's the wattage; we have 100W, 200W, 300W solar panels, and so on. How much solar energy do you get in your area? That is determined by average peak solar hours. South California and Spain, for example, get 6 peak solar hours worth of solar energy. The UK and North USA get about 3-4 hours. Below we ...

In October, an extreme geomagnetic storm stronger than the one predicted for this weekend led to power outages in Sweden and damaged power transformers in South Africa, the SWPC said.

4. Battery Storage. The perfect way to capture every drop of energy and keep it for a rainy day, or night. Battery storage works the same way as immersion diverters by monitoring when there is excess energy being exported and diverting it in to a battery. When the property starts to draw from the grid, the battery will step in and supply the energy saved from earlier.

Falling right in the sweet spot of weight, this power bank is lighter for its power than the Yeti 1500X, and it stays secure when strapped down in a moving vehicle or camper.

In order for homes and businesses to use cleaner, greener energy, more renewables - such as solar power and wind power - will need to be connected to the electricity grid. To do this, we will need to upgrade the ...

Where to get solar power this weekend

We still have a long way to go to reach the Climate Change Committee's goal of 85GW of solar by 2050. But we may just get there with more landowners and homeowners jumping on the solar train. Now, let's get to the ...
