

# Who owns the photovoltaic panels installed on the roof

Is the solar panel company responsible for the condition of the roof?

The solar panel company is not responsible for the condition of the roof before or after installation. One of their installers even mentioned concerns about the condition of my neighbor's roof, stating that he would not be getting on it for fear of falling through it. A few months later, I found out that I needed a new roof and was informed by the company that they would not be removing the panels for the roof replacement.

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

What are photovoltaic roof mounted solar panels?

Photovoltaic (PV) roof mounted solar panels are located above roofs with a specific fire exposure and reaction to fire classification. They satisfy the low vulnerability criteria for a roof covering that is not more than 6m from a boundary, as stated in Technical Handbook Annex 2.C.

Can a rent-a-roof company install solar panels?

Where an installation is owned by a rent-a-roof company, we would expect there to be a signed 'agreement' between the relevant parties, i.e. the homeowner and the rent-a-roof company, such as a lease agreement, with the homeowner agreeing to rent their roof to the company for the purposes of installing solar PV panels.

Can photovoltaic panels be installed on a building roof?

The installation of photovoltaic panels on a building roof or integral with a building roof also raises other code issues (e.g., roof loading, wind loading, fire ratings, weather tightness, mounting systems, roof penetrations, etc.), which may also be relevant for systems mounted on or integral to a wall.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

After all, they're installed on your roof! The answer may surprise you. Solar panel companies actually own the solar panels, not the homeowners. This means that if you default on your payments, the solar company can come and remove the panels. So, do solar panel companies own your roof? No, solar panel companies do not own your roof.

1. Roof Damage. One of homeowners' main concerns when considering solar panel installation is the potential
